

Advisory & Consulting Services

Governance, Risk & Compliance

Unlock your business potential to embrace technological innovations and meet business objectives while managing risk and meeting industry and government legislative and regulatory compliance requirements.

Cyber Security Strategy Development

Establish a security strategy and architecture with supporting security control roadmaps to build your organization's cybersecurity program in alignment with industry recognized cyber security frameworks. Our consultants evaluate your organisation's current security posture and drafts a programme to guide the organisation to achieve its security and compliance targets.

ISMS Establishment Services

Establish an Information Security Management System (ISMS) aligned with the ISO 27001 Standard. The service includes reviewing, developing, and implementing all necessary controls to adhere or comply to the standard, along with establishing a robust security control framework.

Cybersecurity Risk Assessment and Management

Stay resilient and prepare for the unexpected by identifying, analysing, and evaluating cyber risk. Our consultants examine adversarial and accidental threats and assess their likelihood of occurrence, then validate your organisation's vulnerability to these threats and their potential impacts on your data and information systems and recommend applicable countermeasures in a Risk Treatment Plan.

Compliance Readiness Services

Identify compliance gaps against both local and international laws and industry standards like PCI-DSS, ISO 27000 series, SWIFT CSF and more. We ensure you're ready for every audit and prepare you to successfully achieve your compliance goals. Our services include:

- Compliance Gap Assessment
- Security Controls Improvement and Implementation Roadmap
- Security Policies and Procedures Development and Review
- Compliance Audits

Data Privacy Compliance Readiness Services

Assess data management lifecycle to identify key areas of risk and ensure data confidentiality, integrity and availability. Our team helps you optimize your security program to align with industry best practices such as the General Data Protection Regulation (GDPR) and relevant local laws. Our services include:

- Data Protection Impact Assessment (DPIA)
- Data privacy policy development
- Compliance roadmap development
- Security controls assessment and improvement plan

Information Security Governance Framework

Create a framework to enable oversight and provide assurance to executive stakeholders. This includes the creation of policies, processes and practices that would ensure the effectiveness and efficiency of cyber security controls, evidence of business enablement, integration with enterprise processes, execution of strategic objectives, risk management and compliance.

Virtual CISO

Elevate your cybersecurity posture with our expert guidance. The Virtual CISO delivers thought leadership on all matters related to cyber security including proactive management, compliance support, and ongoing guidance for effective risk mitigation. Partner with us for comprehensive security leadership and peace of mind in an evolving threat landscape.
