# Virtual Chief Information Security Officer (vCISO)

Extensive cybersecurity expertise to help your organisation build resilience, meet compliance requirements, and manage cyber risk effectively.

Liquid C2's tailored vCISO services are designed to align with your organisation's unique cybersecurity and compliance requirements, offering scalability to support your growth.

A vCISO provides your organisation with essential cybersecurity guidance, expertise, and oversight to support business growth while safeguarding customer and stakeholder trust, managing risk, and ensuring compliance with regulatory requirements. With extensive experience across industries, the vCISO brings deep cybersecurity knowledge and practical solutions to achieve your organisation's specific goals.

As an on-demand or managed service, the vCISO provides flexible, strategic cybersecurity leadership tailored to your organisation's needs. Acting as a trusted advisor or an extension of your internal team, the vCISO helps guide cybersecurity strategy, enhance risk management, and strengthen overall security posture.

## Expected Outcomes

The vCISO service delivers measurable results across multiple areas:

**Business and Security Alignment:** Align cybersecurity initiatives with strategic business goals by integrating security into enterprise risk management and corporate governance frameworks.

**Operational Efficiency:** Improve processes and enable business initiatives through streamlined security practices.

**Strategic Leadership:** Define and refine the organisation's cybersecurity risk appetite, while ensuring sustained stakeholder commitment.

**Assurance and Compliance:** Implement robust risk management practices while ensuring adherence to applicable legislation, regulations, and industry standards. This includes managing supply chain risks and monitoring cybersecurity performance metrics to maintain a strong security posture.

**Enhanced Visibility:** Provide situational awareness of threats and insights into current versus desired security postures.

**Continuous Support:** Leverage expert guidance throughout the security programme lifecycle, ensuring timely responses to questions and challenges.

## Core Benefits

- **Cybersecurity Thought Leadership:** Access professional guidance to develop and execute security strategies.
- **Regulatory Compliance:** Stay aligned with industry standards, frameworks, and evolving regulations, ensuring an effective compliance programme.
- **Expert Advice:** Receive tailored recommendations for cost-effective solutions and services aligned with your needs and budget.
- **Operational Oversight:** Benefit from governance, risk, compliance, and technology oversight to ensure the effectiveness of cybersecurity initiatives.
- **Cost Efficiency:** Choose from pay-as-you-go or monthly recurring options to suit your business and financial requirements.
- **Business Enablement:** Focus on growth while the vCISO oversees cybersecurity governance, strategy, and planning.
- **Strategic Planning:** Develop and implement a comprehensive cybersecurity strategy aligned with business goals.
- **Risk Management:** Identify, assess, and mitigate cybersecurity risks.

## Flexible and Cost-Effective Engagement Models

Our approach prioritises flexibility and collaboration, avoiding rigid, one-size-fits-all solutions or unnecessary costs. We partner with our clients to provide tailored guidance that enables them to make decisions aligned with their goals and needs.

We offer three tiers of vCISO service to meet varying requirements:

- **Advisor:** Foundational support.
- **Manager:** Advisory and hands-on support.
- **Executive:** Full-service, personalised leadership.

| ADVISOR | MANAGER | EXECUTIVE |
|---------|---------|-----------|
| • High-level security and compliance guidance.<br>• Conducts gap analysis and strategic planning.<br>• Provides risk and compliance advisory.<br>• Delivers periodic reports on security posture. | • Develops and implements tailored security programs.<br>• Provides operational support for ongoing cybersecurity activities.<br>• Manages risk assessments and compliance initiatives.<br>• Oversees incident response planning and execution. | • Acts as a dedicated, senior-level cybersecurity leader.<br>• Aligns security strategy with business objectives.<br>• Offers end-to-end oversight of governance, risk, and compliance.<br>• Provides real-time support for decision-making and board-level reporting. |
