

Identity Protection Services

Enabled by Microsoft Entra

Identity and access security is critically important

As organisations expand their digital footprint, protecting identities has become a core pillar of security strategy. Compromised accounts remain one of the leading causes of data breaches globally, enabling attackers to steal credentials, bypass controls, and gain unauthorised access.

Modern attackers are highly adaptive, using increasingly sophisticated methods to target identities across hybrid, cloud, and multi-platform environments. Identity security is no longer optional — it is foundational to Zero Trust, regulatory compliance, and cyber resilience.

Leveraging the advanced capabilities of **Microsoft Entra**, Liquid C2 helps organisations protect every identity, manage access to all resources, and enforce governance at scale — across users, devices, applications, workloads, and clouds.

Secure Access for Any Identity, from Anywhere.

Your organisation needs complete visibility and control over the identities accessing your systems, data, and applications. This includes employees, partners, contractors, customers, workloads, and machine identities.

You want:

- Stronger protection against credential theft and account takeover
- Automated, risk-based access control
- Continuous governance of permissions and entitlements
- A seamless and secure user experience
- Multi-cloud identity visibility and least-privilege enforcement

Liquid C2's Identity Protection Services deliver unified identity security, governance, and access management — all powered by the intelligent features within Microsoft Entra.

Liquid C2 Identity Protection: Features

Strengthen identity fundamentals for the AI era

- Protect identities and manage access to apps, devices, and data with Microsoft Entra ID
- Manage your domain controllers in the cloud with Microsoft Entra Domain Services
- Get generative AI-powered assistance with Security Copilot in Microsoft Entra

Core Benefits

Prevent identity attacks

Stop threats before they occur with AI-powered protection that detects and blocks evolving identity attacks across all digital interactions.

Enforce least privilege

Limit lateral movement and support compliance by giving employees, AI agents, and workloads only the access they need.

Unify access controls

Simplify security with adaptive conditional access across identities, devices, and networks.

Improve user experience

Enhance satisfaction and efficiency with self-service, fast access, and unified, AI-assisted controls.

Secure access for your workforce

- Help users securely connect to private apps from anywhere with Microsoft Entra Private Access
- Secure access to internet and software as a service (SaaS) apps with Microsoft Entra Internet Access
- Help protect, monitor, and audit access to critical assets with Microsoft Entra ID Governance
- Block identity compromise in real time with Entra ID Protection
- Build user-owned identity scenarios with Microsoft Entra Verified ID.

Secure access for your customers and partners

- Provide external identities with secure access to any app with Microsoft Entra External ID

Secure access for agents

- Manage, govern, and protect AI agents with Microsoft Entra Agent ID

Available in **Bronze, Silver, and Gold** tiers.

Description/Module	Bronze	Silver	Gold
Included service features are linked to IAM and the following solutions: Entra-ID, Private Access, Internet Access, ID Protection, and Verified ID.	Y	Y	Y
8 x 5 Call Desk, Daily administration, and support requests, limited Standby after hours (4 hours per month)	Y	Y	Y
Once a day reactive health, alert and log analysis	Y	Y	Y
Quarterly meeting & Assurance Reporting	Y	Y	Y
Added features are linked to partner and cloud access and including the following solutions: Entra-External ID, Permissions Management, Workload ID, Domain Services, and Privileged Identity Management (PIM)	N	Y	Y
8 x 5 Call Desk, Daily administration and support requests, limited Standby after hours (8 hours per month)	N	Y	Y
Twice a day reactive health, alert and log analysis	N	Y	Y
Monthly meeting and assurance reporting	N	Y	Y
Added features: Auditing, governance and zero trust and including Entra ID Governance	N	N	Y
24 x 7 Call Desk, Daily administration and support requests and Standby after hours	N	N	Y
24 x 7 x 365 Real-time incident and alert monitoring and analysis	N	N	Y
Incident Response Participation or/and remediation when delivered as part of a MXDR SOC offering	N	N	Y
Customized reporting as is possible within default product options	N	N	Y
Monthly meeting & assurance reporting	N	N	Y

The Value of Liquid C2

Professional Security Services (PSS)

Deployment, implementation, configuration, testing, documentation, and handover of all Microsoft Entra capabilities.

Security Support Services (SSS)

Ad-hoc support for customers needing additional skill, capacity, or expertise to manage or optimise Microsoft Entra configurations.

Managed Security Services (MSS)

Enhance cyber resilience against cyber security threats and ensure comprehensive protection with 24/7/365 real-time monitoring from our Security Operations Centre (SOC). These services are tailored for organisations lacking the necessary capacity, expertise, and experience to manage these aspects internally.

About Liquid C2

Liquid C2, a business of Cassava Technologies, delivers cutting-edge cloud and cyber security services and solutions. Committed to facilitating digital transformation, Liquid C2 is positioned to provide comprehensive solutions tailored to meet the evolving demands of the digital era by empowering businesses to navigate the complexities of the modern digital landscape securely. The company's offerings span cloud solutions that enhance accessibility and scalability, and robust cyber security services to safeguard sensitive data and elevate security and compliance posture to ensure businesses remain seamlessly connected and protected.
